

METHOD FOR CHARACTERIZING BIOMOLECULES  
UTILIZING A RESULT DRIVEN STRATEGY

ABSTRACT

In various embodiments, the methods for analyzing a sample are provided  
5 utilizing a result dependent acquisition strategy. In various embodiments, methods for  
analyzing a sample are provided wherein the sample is first analyzed by MALDI and MS  
to produce a first result that is then used to determine a second analysis that is used to  
analyze the sample again by MALDI and MS/MS or MS<sup>n</sup> to produce a second result.
